Old Cambridge Pike celebrates prints and passions of 19th-century New England. From Concord to Cambridge and Boston, the generation who called themselves Young America cultivated a new sense of place in arts and literature while nearby textile mills defined an American print style. The collection focuses on calicoes, neat stripes and florals, the everyday cottons one might have found in the sewing baskets at the Alcotts, the Hawthornes and the Peabody sisters who lived along the Old Cambridge Pike. The prints date to the 1840-1890 era in a warm range of reds and browns with companions of blues and greens. Each print and color name recalls an important image in Young America, honoring the circle of friends, the places they lived and their ideas.
